Meeting objective

To clarify the requirements that we get earlier, the requirements were below:

1	Board
2	Standard ship-sets
3	Standard rule-sets
4	GUI
5	Fast Game
6	HUMAN-HUMAN Player Or HUMAN-AI PLAYER

Action review

1. Board
a.Consist of 10x10 fields and it could be changed in the future.

2. Standard ship-sets.
a. In the future standard ships could be changed (features: color, name), so team is ready for changes. For now ships are set like in normal, ordinary game battle ship.

3. Standard rule-sets
a.We didn't talk about the rules exactly so just use the standard ones.

4. GUI
a.The customer doesn't have any proposition until now for the GUI. It is not clear if the application is a web application or desktop application.

5. Fast Game
a.The flow of the game must be fast.

6. This game has 2 players and it could be HUMAN-HUMAN or HUMAN-AI.
